Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. This application is in condition for allowance except for the following formal matters:

The claims are objected to for the following informalities:

In claim 80, line 1, --the step of-- should be inserted after "wherein" for proper antecedence.

Claim 81 should be cancelled.

In claim 83, line 1, "wherein the sample particles comprise" should be changed to --further comprising--.

In claim 88, line 1, "wherein the step of detecting" should be deleted and "comprises" should be changed to --comprising--.

In claim 89, line 1, "wherein the step of detecting" should be deleted and "comprises" should be changed to --comprising--.

The proposed amendments serve to overcome the following issues:

With respect to claim 81, the embodiment in which only one bead commensurate in size with the crater is present does not include detecting the number of particles. Should applicant disagree with this interpretation of the specification, applicant should point out the support for this claim.

With respect to claim 83, the lid particles are in addition to the smaller particles being counted. Should applicant disagree with this interpretation of the specification, applicant should point out the support for this claim.

With respect to claims 88-89, the additional sensors are not used for detecting the number of particles, but rather for detecting properties of the particles. Should applicant disagree with this interpretation of the specification, applicant should point out the support for this claim.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
